TITLE	Career Placement and Graduate Transfer Report, 1998.
INSTITUTION	Community Coll. of Rhode Island, Warwick.
PUB DATE	1999-05-00
NOTE	61p.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Research (143) -- Tests/Questionnaires (160)
EDRS PRICE	MF01/PC03 Plus Postage.
DESCRIPTORS	Annual Reports; College Transfer Students; Community Colleges; *Graduate Surveys; *Graduates; Institutional Research; Job Placement; *Outcomes of Education; Tables (Data); *Two Year College Students; Two Year Colleges; Vocational Followup
IDENTIFIERS	Community College of Rhode Island

ABSTRACT

This report presents the results of a 1999 study on the employment and continuing education status of 1998 Community College of Rhode Island graduates. A survey for the class of 1998 was distributed to 1203 graduates. Two mailings and a telephone follow-up survey resulted in 1106 respondents (78.8 percent response rate). Eighty-three percent of graduates were employed and fifty-eight percent were employed full time. Thirty-four percent were continuing their education, while less than four percent were seeking employment. Data on graduates in 27 different disciplines includes employment or educational status, average salary, and specific businesses employing graduates. Appendix A presents the survey instrument. Appendix B offers graphs comparing placement, transfer, and average salaries of 1996, 1997, and 1998 graduates in Business & Commerce, Computer Science, Engineering & Technologies, Health & Paramedical, Public Service Technologies, and General Programs. Appendix C provides a summary comparison of 1996, 1997, and 1998 graduates; including number of graduates at specific local four-year institutions. (RDG)

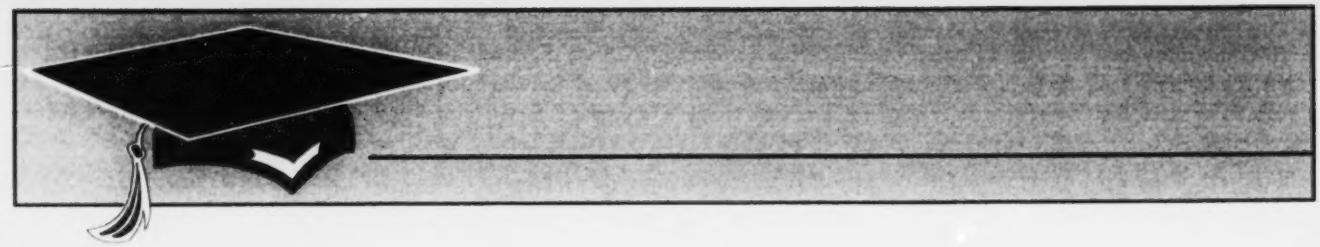
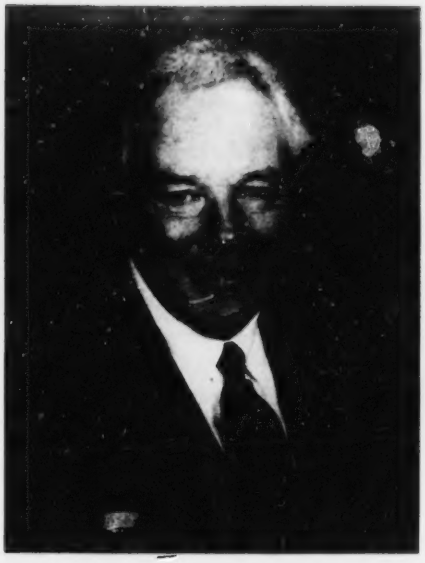
Community College of Rhode Island does not discriminate in admissions, services or employment on the basis of sex, race, color, religion, national origin, ancestry, sexual orientation, age or handicap.





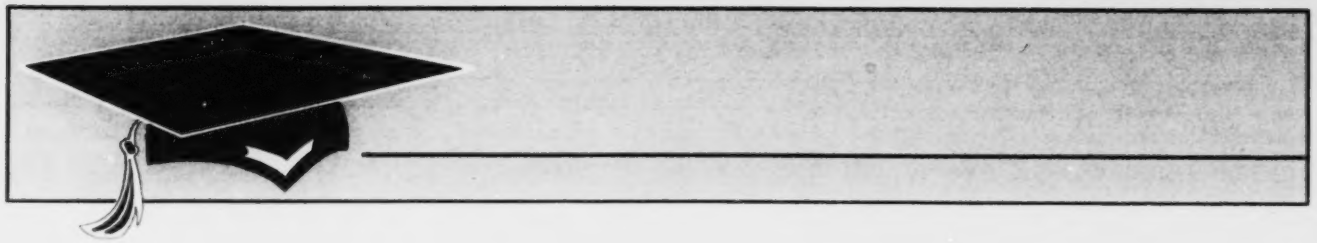
A Message from the President

Students who are successful in completing a program of study at the Community College of Rhode Island achieve their education or career goals by transferring to a four-year college or university, obtaining employment in their chosen field or by a combination of work and continued study.

The Career Placement and Graduate Transfer Report documents the education and career activities of our graduates once they leave CCRI. The report provides information about the employment status and salary ranges of graduates who elect full-time employment as well as a listing of colleges and universities chosen by those who went on to continue their education on a full-time basis. The information is useful in advising current CCRI students, and is a valuable resource for guidance counselors in secondary schools throughout the state, and for businesses and industries that are potential employers of our graduates.

The Community College is proud of its placement and transfer record. I'm sure that you will find the information contained in this report impressive as well as useful.

Edward J. Liston



"After I graduated from CCRI, I was able to transfer to Bryant College and eventually earn an MBA...CCRI was the right choice for me."

Glenda M. Jackson
Premium Auditor
Beacon Mutual Insurance Company

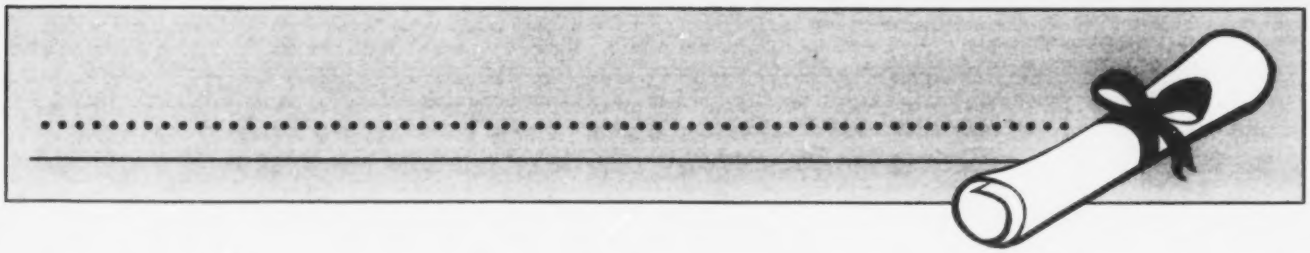
"The education I received at CCRI gave me the foundation I needed to continue my education and receive my MBA."

Steve J. Issa
Senior Vice-President
Sovereign Bank



Preface

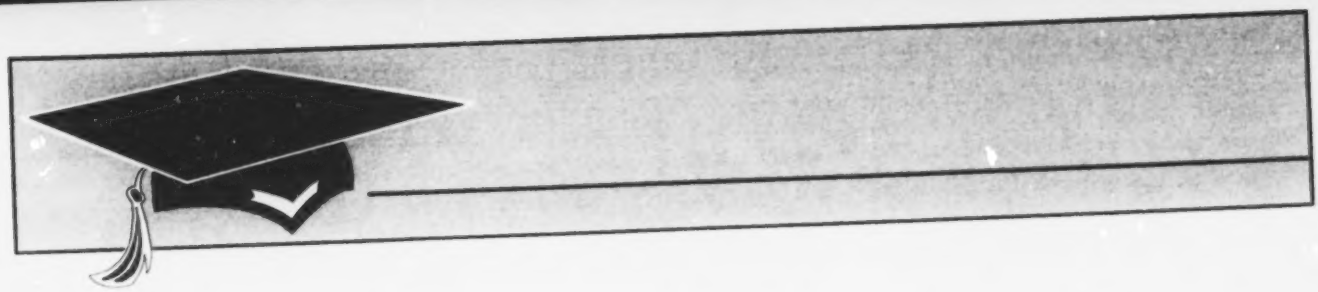
Each year, the Community College of Rhode Island conducts a study on the employment and continuing education status of the previous year's graduates.

This year, a survey for the class of 1998 was distributed to 1403 graduates. Two mailings and a follow-up telephone survey produced a total response rate of 78.8 percent. A sample questionnaire is provided in Appendix A.

Results from the survey indicate that, with small exception, 1998 graduates are employed and/or continuing their professional studies. The statistical breakdown reveals that 83.2 percent of the 1998 graduates are employed (58.3 percent full-time), 34.0 percent are continuing their education (20.7 percent full-time) and 3.9 percent continue to seek employment. Information comparing responses of graduates from the classes of 1996, 1997 and 1998 can be found in Appendix B.

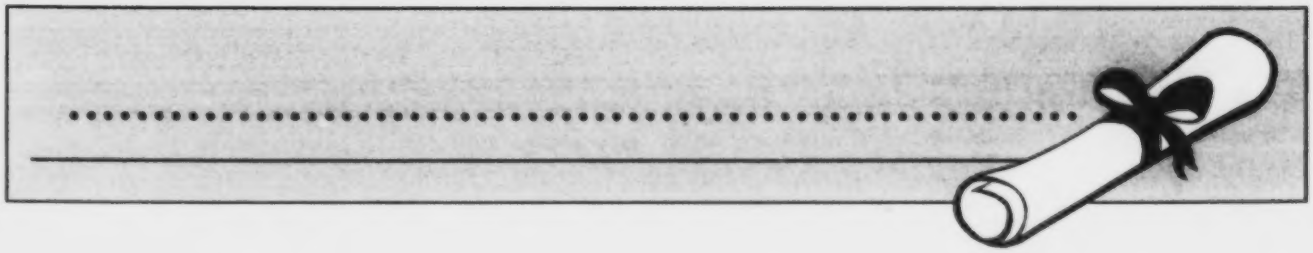
Since the Report on Career Placement and Transfer of 1998 Graduates is based on a self-report survey, some caution in interpretation is suggested. The following information should provide further clarification of the data. Average salaries, based on a 40-hour week, are reported only for education-related employment and may show an unexpected broad range due to data collected from both graduates in entry-level positions and professionally employed graduates who attended CCRI for further professional development.

The overall results from this year's Placement and Transfer Report again validate, as did all reports since 1985, CCRI's success in preparing students for careers and for further education.



"I wouldn't be where I am today without CCRI ...I learned marketable skills and the instructors were great."

Sharon A. Ginaitt
Radiologic Technician
Roger Williams Medical Center

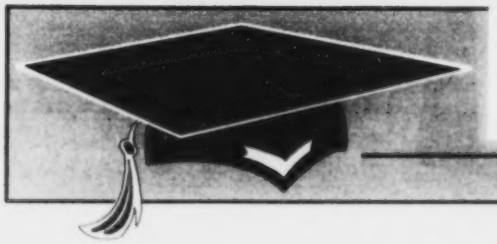


SURVEY STATISTICS FOR CLASS OF 1998

1403 GRADUATES

1106 RESPONDING **78.8%**

498	Employed Full-Time	45.0%
147	Employed Full-Time/Education Part-Time	13.3%
166	Employed Part-Time	15.0%
23	Unavailable For Employment	2.1%
43	Unemployed & Searching	3.9%
120	Education Full-Time	10.8%
109	Education Full-Time/Employment Part-Time	9.9%



Business Administration .....

The Business Administration Program focuses on providing students with a solid academic background in business as well as specialized training in a variety of areas. Students receive a solid foundation in management, marketing and accounting. They also learn critical thinking, problem solving and decision-making skills. A cooperative education option offers students an opportunity to gain work experience while in school.

Cardio-Respiratory Care.....

A respiratory care worker is an allied health specialist employed under medical supervision in the treatment, management, control, diagnostic evaluation and care of patients with deficiencies and abnormalities associated with the cardiopulmonary systems of the body. CCRI's two-year, six semester program incorporates college classes with clinical practice. Graduates must pass a national entry-level examination. Respiratory therapy personnel are employed in hospitals, nursing facilities, clinics, doctors' offices, home care companies, rehabilitation centers and municipal organizations.

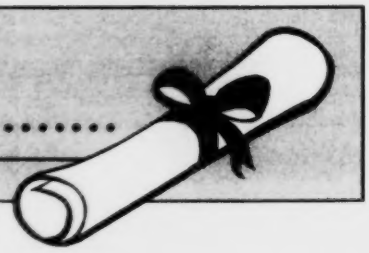
1	Sturdy Memorial Hospital	Respiratory Therapist
0	Employed Outside Field	

Chemical Technology



The Chemical Technology Program integrates experimentation, lecture and recitation materials to produce a unified presentation of analytical, inorganic, organic and industrial chemistries. It is designed for students who are more interested in the application of science than the mathematical descriptions of theoretical concepts. The program is accredited by the American Chemical Society. Graduates from the program find employment in areas ranging from aerospace and biochemistry to pollution control and zinc metallurgy.

1998 GRADUATES OF PROGRAM: 9

1998 Graduates of Program Responding: 6 66.7%

Clinical Laboratory Technology

(formerly Medical Laboratory Technology)

Clinical laboratory technicians perform all of the routine tests in an up-to-date medical laboratory. The technician is required to know specific techniques and instruments. The CLT Program is a two-year program that includes clinical training. At the end of this experience, students are eligible to take a certification examination to become licensed by the State of Rhode Island. Graduates work in private laboratories, doctors' office laboratories, hospital labs, research, sales and commercial laboratories.

BEST COPY AVAILABLE

Computer Studies

CCRI offers two Associate in Science degree programs in the computer area. The Computer Programming degree program prepares the student to enter a modern programming environment. It stresses problem definition and solution design using different programming languages in the development of applications. The Microcomputing degree program prepares the student to enter a workplace that emphasizes the use of the personal computer as a stand-alone device or in a networked computer environment. This program prepares an individual to be employed in computer user support services. The college also offers one year certificate options, which emphasize technical work only, for students who already hold a Bachelor's Degree or have two years of work experience in a computer-oriented profession. The career paths of graduates have been changing in recent years; instead of working in programming positions which typically lead to systems analysts positions at banks or insurance companies, students are going to work for major companies to man the "help desk."

Criminal Justice & Legal Studies.....

The Criminal Justice and Legal Studies Program is designed to provide students with the academic courses and specialized training required for a law enforcement career or a paralegal position. The program meets the requirements established by many police departments which mandate successful completion of 60 hours of college course work in law enforcement for consideration for employment. The Legal Studies Program prepares students to become paralegals for the legal profession and the business community.

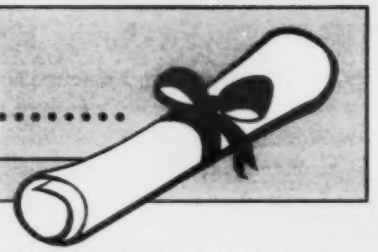
Electronics



The Electronics Technology Program trains individuals to be electronic repair and troubleshooting technicians. Students develop an understanding of both theoretical and practical applications of circuit design, construction and testing of systems. Graduates of the program generally enter the workforce as entry level technicians at companies such as Cherry Semiconductor, International Business Machines, Digital, Toray Industries, AT & T and Xerox.

Engineering

The Engineering Program is designed to provide a firm background in basic engineering principles. Students who successfully complete the program may transfer to a four-year institution or go directly into employment as an engineering assistant. The curriculum includes a strong foundation in mathematics, the basic sciences and engineering fundamentals, as well as liberal arts courses.

Engineering Technology.....

CCRI has two Engineering Technology Programs. The Electronic Engineering Technology Program educates students as technicians in the design, development and testing of engineering models and systems. Graduates of this program pursue careers as engineering associates, engineering aides in research and development, field engineers, sales engineers, engineering technicians, technical writers or assistant production managers in the electronics industry. Due to the increasing complexity of electrical and electronic equipment, many students decide to expand their knowledge by pursuing a four-year degree in engineering technology. The Mechanical Engineering Technology Program trains students to convert engineering theory into working plans in order to solve real world problems. The students study traditional engineering subjects such as physics, math, statics, materials and mechanisms as well as taking courses in the areas of robotics, tool design, quality control, CAD, production planning and cost estimating. Graduates are qualified to seek employment in the design as well as the manufacturing or industrial engineering areas.

The Computer Engineering Technology Program offers students a chance to acquire heavier concentration in computer education. Computer engineering technicians are needed to assist engineers in the design, development and testing of new devices, and they are needed to install, operate and maintain computer equipment. In industry they may be found in design, in sales, in research and development, or in the field providing technical information and service to the users of computer engineering technology.

The Telecommunications Engineering Technology Certificate is designed for individuals who already have a basic knowledge of mathematics and circuit theory. Telecommunications technologies are needed to plan, install and maintain state-of-the-art telephone systems, cable TV and computer networks. Although technologies have knowledge of theoretical topics, they tend to focus on solving practical design and application problems.

Fine Arts

CCRI offers the Associate in Fine Arts degree in Art, Jazz Studies, Music and Theatre. These programs serve both students transferring to a four-year college or professional school and students who wish to pursue a career. They provide hands-on experience in the first two years of higher education, a strong foundation in the humanities, exposure to interdisciplinary study. CCRI offers the only Jazz Studies program in Rhode Island and the only theatre program which offers jazz, ballet and modern dance. Students in the theatre program develop skills and creativity in the areas of acting, musical theatre, technical theatre and communications. Visual arts students focus on ceramics, interior and graphic design, and photography. Music students may concentrate on performance, teaching, communications, composition or the music business.

Human Services.....

Human service workers perform in a variety of educational and therapeutic settings with individuals, groups and families. Students receive an education which combines competency-based training specific to each education and social service concentration with supervised field work internships. Graduates may continue their education or enter the human service delivery system as child care and special needs professionals, social work case aides, assistant teachers, residential care providers and substance abuse counselors.

Liberal Arts.....

The Liberal Arts degree program is designed for students intending to transfer to baccalaureate degree programs following graduation from CCRI. It requires coursework in English composition including research writing, mathematics and laboratory sciences, history and the social sciences, and the fine arts and languages. Graduates transfer most often to Rhode Island College and the University of Rhode Island, although CCRI also has agreements with nearly 66 baccalaureate colleges and universities throughout New England. These agreements guarantee admission and junior year status to CCRI liberal arts graduates with satisfactory grades. These colleges include Bryant College, Salve Regina University, Roger Williams University, Boston University, UMass/ Dartmouth, Stonehill College, Worcester State College and Suffolk University.

Machine Design

The Machine Design Program offers students practical skills in the detailing and design of mechanical components. Students receive instruction on both traditional drafting equipment and computer-aided drafting and design equipment. Graduates of the program generally accept positions as beginning detailers, advancing to designers. They may also transfer to Industrial Technology Programs at Northeastern University and Roger Williams University.

Nursing (Licensed Practical)

The Practical Nurse Program is part of the articulated nursing program. Once accepted into the program, students can complete the requirements for graduation within eleven months and are eligible for the licensing examination for practical nursing. Graduates of this program are quickly assimilated into the health care field and work in a variety of health care settings. As a graduate of this program, the licensed practical nurse may return within five years and complete the requirements necessary to receive an associate degree in science for registered nurse in one year.

Office Administration.....

The Office Administration programs are designed to emphasize a variety of computer tasks created by new technologies as well as traditional office tasks. With the shift of work responsibility from middle management, the role of the office professional has become critical. The department's programs have been developed to address changing workplace requirements. Program options include administrative assistant/secretary, legal administrative assistant/secretary and medical administrative assistant/secretary. Cooperative education experience is available to students.

Physical Therapist Assistant....

The physical therapist assistant works under the supervision of the physical therapist to treat patients with physical disabilities resulting from disease, injury or other bodily conditions. Their duties include assisting the therapist in implementing treatment programs according to the plan of care established by the physical therapist, training patients in exercises and activities of daily living, conducting treatments using special equipment, administering modalities, and reporting patient responses to the physical therapist. The program is a two year program which includes 16 weeks of clinical experience. Passage of a licensure examination is required. Physical therapist assistants work in hospitals, clinics, rehabilitation facilities, long-term care facilities, extended care facilities, school camps and in patients' homes.

Manufacturing Technology.....

(formerly Machine Processes)

The Process Control Technology Program is a study of the electronic, pneumatic or hydraulic instruments used in the field of process control. Students are trained to calibrate, maintain, repair and operate instruments used in process control systems such as power generation, chemical, pulp and paper, water and wastewater, and food and beverage systems. Graduates obtain jobs as process engineers/technicians, instrument and control technicians, and test and evaluator technicians. This program is one of only two in New England.

A radiographer is a person who uses x-radiation, a knowledge of anatomy, and imaging principles to aid physicians in the diagnosis of disease, in monitoring patient progress and in controlled screenings to help prevent disease. A radiographer works in hospitals, clinics, doctors' offices, and private emergency rooms. The profession offers numerous opportunities for advancement, including computed tomography and special procedures. With one year of additional education, there are opportunities in medical ultrasonography, nuclear medicine and radiation therapy.

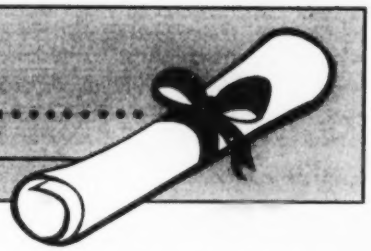
Retail Management.....



The Retail Management Program is designed to prepare students for careers in mass merchandising or fashion merchandising. A major component of the program is the cooperative work experience in which students are employed in retail establishments throughout the state. Graduates obtain employment in department stores, specialty shops, chains, catalog showrooms, and off-price stores. Within each type of store there are career opportunities in merchandising, buying, management, sales promotion, human resources, loss prevention, real estate, operations, distribution, finance and accounting.

Science

The Associate in Science Degree program is divided into two tracks. Track A is intended for those who expect to go into the fields of forestry, home economics, mortuary science, nutrition, dietician, optometry, physical education or plant science. Track B is for those who wish to enter astronomy, biochemistry, biology, biophysics, chemistry, geochemistry, geology, geophysics, marine biology, meteorology, oceanography, pharmacy, physics, pre-medical, pre-dental or pre-veterinarian studies. Both tracks require proficiency in English, foreign languages, mathematics, as well as the sciences. This is primarily a transfer program.
